

Eric Wright Civil Engineering, a part of the Eric Wright Group of construction and development companies, are looking for subcontractors to support our operations across not only in the rail but also in other sectors across the Principality

We are an award winning contractor, part of a financially strong Group and our ultimate ownership by a Charitable Trust demands that we procure our subcontracts and services ethically. All profits we make are either re-invested in our Group or given to charities

Eric Wright Civil Engineering Ltd undertakes a comprehensive range of civil engineering projects for a large and diverse range of clients. These include national bodies, regional clients from both the public and private sector, through to a number of local businesses.

Our primary areas of business can be classified into the following sectors:

- Highways - We have over 25 years' experience in highway infrastructure projects ranging from none motorised paths through to major motorway projects and large, complex bridge and highway construction.
- Infrastructure - We carry out a variety of development projects for commercial, residential and local authority clients, including associated adoptable highway and drainage e works and services installations. Other works include: ground remediation, access roads, bridge works, car parks, park and ride schemes, hard standings, lighting, drainage and landscaping.
- Energy – our portfolio of works includes building England's largest low head hydro-electric power plants, substations and battery storage plants.
- Water - Civil Engineering including dams and reservoirs - Our project history includes significant works to embankments, spillways, weirs and other major structures, many which have been carried out in environmentally sensitive areas.
- Rail - We are a RISQS accredited supplier. Our clients include Network Rail, Transpennine, Northern, Merseytravel and Heritage railways. This has included station improvements, car parks, structures, embankment stabilisation and drainage. We have completed rail related contracts for private developers, National Highways and local authorities
- Our excellence in delivering civil engineering projects has been recognised by many accolades including delivering Constructing Excellence's Civil Engineering Project of the Year 2021, with other awards from industry bodies including ICE Yorkshire and Humberside, ICE North West, CECA North West, British Construction Industry Awards, Civic Trust, Offsite, Structural Steel Design Award, etc.
